

# Indus P-600

## Professional Two-Way Radio

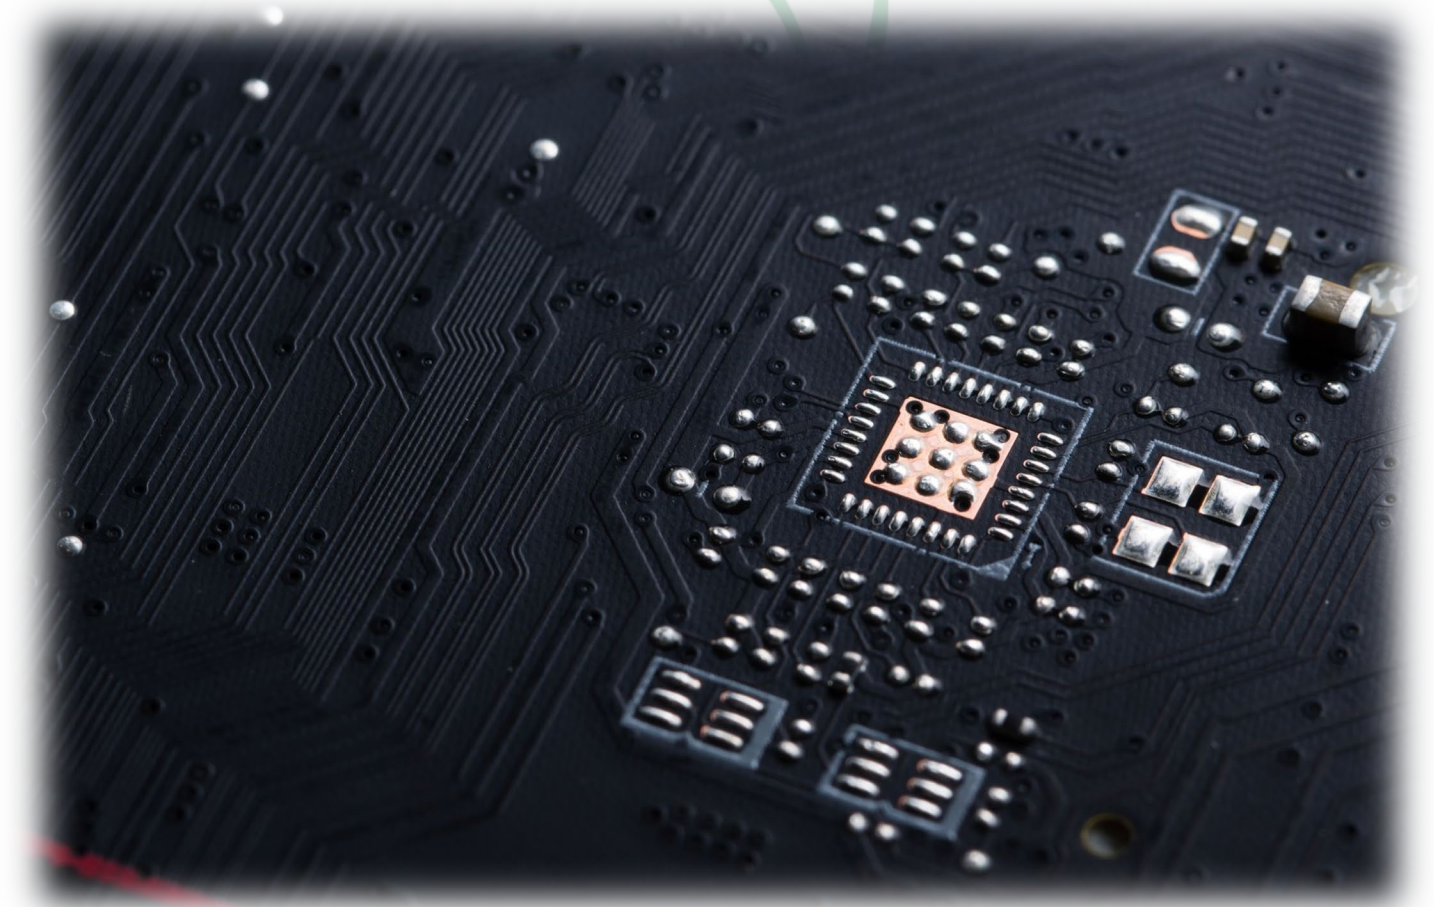

The Indus P600 is designed for professionals who demand robust, high-quality communication tools.

Combining advanced technology with a user-friendly design, this two-way radio ensures reliability and clarity in every interaction.

# Key Features

1. **Wide-band Coverage:** Enjoy flexible frequency options tailored to meet your work environment needs.
2. **Superior Audio Quality:** With voice compander technology and a powerful 1W speaker, the Indus P600 delivers crisp, clear sound even in noisy settings.
3. **Enhanced Safety Features:** Equipped with Lone Worker, Man Down (optional), and Emergency Siren functions, ensuring safety in emergencies.
4. **Secure Communication:** The built-in Scrambler feature enhances privacy, safeguarding your communications.
5. **Channel Annunciation:** Announces the current channel when powered on or during channel switching, enhancing ease of use.
6. **Versatile Signaling:** Supports signaling systems that include Identification, Voice Storage, and Group Call, with compatibility for extended options.
7. **Whisper Mode:** Transmit even the quietest messages clearly, ensuring your message is received when discretion is essential.

**SURYA**  
INFORMATION TECHNOLOGIES PVT. LTD.  
Formerly known as Surya Telecom Pvt. Ltd.

## Applications

The Indus P600 is ideal for industries where secure and clear communication is paramount:

- Security and Safety Teams
- Fire and Rescue Operations
- Construction Sites
- Hospitality and Property Management
- Public Utilities and Transport

## Additional Functionalities

- **Emergency Alert:** Activate an emergency alarm or send alerts directly to a designated person or control center.
- **Auto Contact Alert:** Get notifications when moving out of the communication range, vital for remote or fieldwork.
- **Power on Self-Test:** Automatic diagnostics upon startup for early fault detection.
- **Patrol Record (Optional):** Track patrol data in real-time for security applications with the optional Patrol System.

## Accessories

Standard:

- Li-ion Battery (1700mAh)
- Rapid Charger
- Belt Clip, Strap, Antenna

Optional

- Higher-capacity batteries, multi-unit chargers, vehicle adapter, various earpieces, headsets, and more.

## Specifications

Frequency Range: VHF (136-174 MHz), UHF (350-490 MHz)

Channel Capacity: 16

Battery Life: Approx. 14 Hours (with 1700mAh Li-ion battery)

Dimensions: 122x55x35mm

Weight: 316g (with battery and antenna)

Durability: MIL-STD-810C/D/E/F Compliant
